## Beamline: Status

---

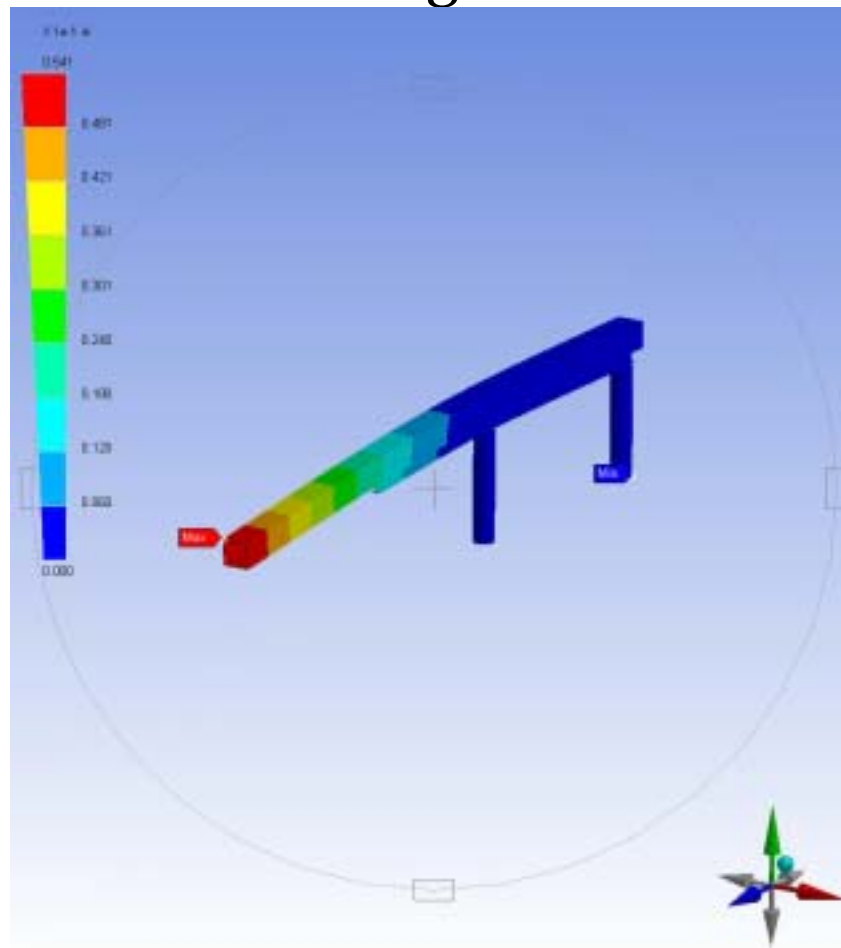

The last 12 m of guide

Installation starts mid Feb-03

# Guide sag

# Beamline Commissioning

---

- With the temporary cave (?) we can measure
  - Moderator brightness measurement
  - Test of shutter
  - Test the ER1 part of guide
- If we do not do the temporary cave, then we need to do in the cave an engineering run
  - Moderator brightness measurement
  - Test of shutter
  - Measurement of the guide performance
  - Chopper test

## The new main milestones for the beamline:

- The guide shipment 12/30/02.
- Integrated shielding opened 2/15/03
- Chopper installed and tested 2/20/03
- Guide installation completed by 2/28/03
- Integrated shielding closed 3/30/03
- Guide tunnel shielding in place 3/15/03
- End of beamline construction in 3/15/03
